Hospital District Established

Preliminary Meeting on Monday
A Municipal Hospital District, embracing an area of from 50 to 60 miles on all sides of Calgary, has been established by order of Hon. Charles Mitchell, Minister of Health. This order was published on 12th inst.

The first meeting of the provisional Board of Governors of the new district will be held in Calgary on Monday, 27th inst., when an endeavor will be made to arrive at a plan for hospital service throughout the whole district that will be satisfactory to the majority and will fully serve the needs of the districts represented.

The present boundaries of the district have been the subject of much discussion. They have been suggested by the public health authorities, and also by the representatives of the various municipalities in the district.

The plan that has been adopted for the present time is for a large hospital for major cases at Calgary with a number of sub-hospitals at central points throughout the district, which would take care of emergency, minor and maternity cases. Before the scheme comes into operation it will be fully explained to the people, and a vote will be taken for and against, a resolution being requested to put the scheme into operation.

Feeling throughout the country is much in favor of Municipal Hospitals, and if local jealousies are subdued and to the public good, there is no doubt of the scheme being carried out.

Three townships of Grassroots Municipality are already in the district, or Hospital District. The section now is three and a half miles, and this guarantees hospital treatment at the nominal rate of \$1.00 per day.

The scheme is a form of advanced social legislation and is very highly regarded, especially throughout the rural districts, as the security of competent female help at outlying points has resulted in great discomfort and risk.

Threshers Busy

Threshermen throughout the district are very busy at present. Up till now it has been estimated that about twenty per cent of the grain has been threshed. The weather still continues ideal for threshing operations.

When, so far as it has been threshed, it is running on stubble from 15 to 25 bushels per acre, with an occasional field from 25 to 35 bushels per acre. Cuts are averaging from 10 to 50 bushels per acre, and rice from 20 to 35.

Some people are getting larger returns from their fields than they had hoped for, while with others it is the other way round. Everyone, however, has a good crop, and if it had not been for the very hot weather the first crop of August it would have been a bumper.

The weather has been a little better than ever before and the return from it will be larger than from any crop ever harvested in Strathmore district.

Grain loading commenced at the beginning of last week, and a steady stream is coming from the elevators. So far there has been no car shortage at C.P.R. points, though the C.N.R. is already in trouble.

O. F. Brener in Stock Firm

(Market Examiner)
The Bank Hill Cattle Company's offices have been opened at the Calgary stockyards and the new firm has not lost a minute about getting into business, for already they have acquired a great many stockers and feeders in the yards, this being one of the times in which they will be particularly engaged, as well as dealers in cattle generally.

The company has been incorporated with Frank Hill as president and manager, with O. F. Brener and J. L. Butler on the directorate, on which there are other prominent stockmen who will not be actively engaged in the affairs of the company. As was mentioned a short time ago the firm has been fortunate enough to secure the services of Chas. Higgs, as secretary and treasurer, who will have charge of their office management.

All the members of the firm are well-known as stockmen and have been operating independently on the yards for a considerable time. The

Liquor Importation Vote Oct. 25

Who Are Entitled To It.
On October 25 a referendum will be held to determine whether the importation of intoxicating liquor into the Province for beverage purposes is to continue.

At present the situation is that liquor is not allowed to be sold (10 days) within the Province, for beverage purposes, but that householders may send to other provinces and obtain a limited supply for their own private consumption.

Other sources of liquor supply are by drug stores on doctors' prescriptions, which are supposed to be used only for individuals requiring liquor as medicine. This provision has caused an alarming jump in the sales statistics of the province since its inception. The other methods of obtaining liquor are by underground routes, that is, by illicit sale (bootlegging, etc.) and by private manufacture.

Premier Chas. Stewart, of Alberta, has stated that if an overwhelming vote is given in favor of the abolition of importation for beverage purposes he will send the Province home-day.

The following are eligible to vote at this referendum:

1. Every person (not an Indian and not disqualified by official position, crime, or otherwise) who is:
2. Twenty-one years of age, and
3. IS NOW A BRITISH SUBJECT by birth or personal naturalization and who
4. Has resided at least one year in Canada and two months in the electoral district where he seeks to vote, preceding the issue of the writ of election (April 29, 1920).

NOTE—

- (a) Any British-born woman, married or unmarried, is entitled to have her name placed on the Voters' List without a Judge's certificate regarding the nationality of her husband or father, provided (1) she has the necessary age at the time thereof, and (2) she has NOT been personally naturalized as a citizen of a foreign country.
- (b) Any married woman who was born on the North American continent and whose husband is now, or if deceased, was at the time thereof a British subject by birth or naturalization, is entitled to have her name placed on the Voters' List without a Judge's certificate.
- (c) Any married woman of other than British origin, who was born on the North American continent and whose husband is now, or if deceased, was at the time thereof a British subject by birth or naturalization, must personally before a Judge and from him receive a certificate before being entitled to have her name placed on the Voters' List.
- (d) Any man or unmarried woman who is British-born or was born on the North American continent and who obtained naturalization through his or

her parents may have his or her name placed on the Voters' List without a Judge's certificate.

(e) Any man or unmarried woman of North British origin and born of the North American continent, who obtained naturalization through his or her parents, must appear before a Judge for a certificate as stated above.

(f) Every Indian who is not ordinarily resident on an Indian reserve and qualifies under Section 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

New Train Service

We understand that on the 22nd of October a new train service will come into effect. A local train will be put on between Empress and Calgary, going north on Wednesdays and Saturdays. There will also be a change in the times of Nos. 2 and 4 and Trans-Canada comes off for the winter.

The exact times of the trains have not yet been received at Strathmore, but we hope to be able to give them in our next issue.

Address by Mrs. McKimney

Mrs. McKimney, M.L.A. for Carleton Place, will address a mass meeting in the Methodist Church on Monday evening of next week, on the subject of "The Liquor Referendum." Mrs. McKimney is a eloquent and forceful speaker who has made a big reputation in the Provincial House in the years since she has been elected.

Everyone, no matter what their views are, would do well to attend this meeting. Mrs. McKimney is speaking under the auspices of Strathmore Women's Institute.

A man was taken to Mr. and Mrs. Nelson, Strathmore, at Strathmore Hospital last week.

Rev. Robt. Pearson, speaker of the C.E.P., will be the lecturer in the Union Church on Sunday.

Mr. F. Scherer is making a slight but steady improvement each day. He is now able to say a few words. For a time after he was brought in after his accident he was not able to speak at all.

According to a report from the north end has been struck by the Imperial Oil Company's oil tank and within the area of the north end of Great Slave Lake and close to the Mackenzie River. The flow of oil is said to be about 10 barrels per day, but it is regarded as a serious indication that a very large flow is to be expected in the locality. Other enterprises of the Imperial Oil Company are regarded favorably especially in the Far North region where oil has already reached a depth of 2,000 feet.

The Catholic Ladies Aid will hold a party sale on Saturday, October 2, in the Sample Room of the R.M. Edward Hotel.

Carlsland Notes

Mrs. Nap. Lloyd has gone to Montreal on a two months visit. Mr. Lloyd another died there lately.

Mr. Jones, of the Bank staff, has been recovered from his illness, and is back on duty. Mr. Kesteven, who was relieving, has now returned to Strathmore.

We are sorry to hear of the impediment of Rev. P. E. Lund, who has been officiating as pastor of the church here for the past eighteen months. Mr. Lund's health is such that he is not able to stand the strain of outdoor travelling in the winter, and he has accepted an appointment as pastor of a church in South Calgary. During his stay here Mr. Lund endeavored himself in his congregation, and they are very sorry to see him go.

Mr. W. A. Brown brought Carlsland upstate with the installation of an electric light plant, which, besides supplying his store will be used for the illumination of various other places in town. The plant is a Fairbanks-Morse, 10-hp., 220-volt type, and was installed by Mr. G. C. Oulman.

Hail Storm at Nanton on Sunday

This district suffered from a hail storm last Sunday afternoon, but an accurate estimate of the damage is impossible. Standing grain in the track of the storm suffered in some cases the full force per cent. That which had been cut but not stacked suffered nearly as much as if it had been standing. Grain in the stacks was hurt some but the loss is light. Fortunately, most of the grain was in stock, so the percentage of loss for the whole district will be comparatively light, although some individuals have suffered severely.

The track of the storm was about three miles wide, 8 or 10 miles long, and extended from the south to the north. The direction was from northwest to southeast, and some wind-swept areas were seen or stated to have around Nanton, but we have not heard how far it has extended.

People were beginning to expect to get through the season without hail, although such storms have visited us as late as the middle of September.

—Nanton News.

Advises Early Shipment of Grain

To the Editor:
Information has been received by the Department of Agriculture from the Canadian Pacific Railway that the company has a large surplus of cars awaiting loading and in view of the heavy crop of grain to be shipped there is prospects of a car shortage late in the season.

The Department would therefore urge farmers and grain firms to ship as much grain as possible to the head of the Lakes during the present month. In doing this, the Department is not in any way advising people to sell grain at the present time as this is a matter which each man must decide for himself.

H. A. CRAIG,
Deputy Minister,
Department of Agriculture.

Endorsed by Alberta's Premier

Edmonton, January 23rd, 1915.
Dear Sir:
I beg to acknowledge receipt of your letter of January 20th, 1915, in regard to "Scott's Simplified Accounting System for Farmers," for which system accept my thanks.

This system should be very useful to farmers, providing them with a simple method for keeping a record of their expenses and expenditures. It is quite complete as well as simple, and the necessity of a work of this kind need not be pointed out.

Yours very truly,
CHAS. STEWART,
Premier, Alberta.
321 Grain Exchange,
Calgary, Alta.

For sale in this district only by John Mackenzie, Strathmore.

Namaka Items

The "Harvest Thanksgiving" service and "Bully Day" services will be held at Namaka on Sunday next, Sept. 26th at 2:30 p.m. A hearty welcome is extended to all.

A special offering will be taken to defray the general fund for Sunday schools.

Gifts of fruit and vegetables will be appreciated if taken on Saturday afternoon to the Oldfellow's Hall.

Women to Speak This Time

Newly Enfranchised Alberta Women—\$5,000 of them—will roll up an overwhelming vote against the importation of intoxicating liquor into our provinces. See that your name is on the list.

E. W. BEATTY, C.P.R. President who is inspecting western lines at present.

[illegible]

Eleven Years' Performance Proves OilPull Dependability

ELEVEN years ago the first Rumely OilPull tractor was put on the market. They were the industry's pioneers and went into the great unbroken prairies of the Northwest and Canada. They went up against the toughest conditions of soil and climate that ever tested a tractor. And they "made good"—their owners will tell you that.

Many thousands of OilPulls have followed those pioneers, and in these eleven years the OilPull has built up a record of continuous, reliable, economical operation that is unequalled in the pages of tractor history. In fact, the first OilPull built are still on the job—Old Number One in South Dakota, Number Six and Number Nine in Kansas, and many others—year after year of continuous service and still good for many years more.

So the OilPull has built a remarkable record for the kind of service it will deliver to its owner. Eleven years test has proved the correctness of OilPull design and this same assurance of dependable service is in every OilPull you buy—no matter the size. Today the OilPull is made in sizes to fit every need—from 3-plow to 10-plow—and every one is backed by a written guarantee—12-20, 16-30, 20-40 and 30-60 H. P.

Let us tell you more about this famous oil-burning, oil-cooled tractor.

While the Family Sits Around

On quiet evenings or afternoons, put on your favorite records. Play any selection you wish. Be sure to play some of mother's favorite old-time songs and one or two of dad's familiar ballads—play them all on your Columbia Gramofon.

You will get reproductions of exactly what the artists themselves produced on the original wax. Every note, every tone is distinct. The Columbia tone leaves give you complete and accurate control over tone volume without sacrificing tone quality or any of the beauty of your choicest records.

Then there's the *Non Set Automatic*—Stop—no other phonograph has it—built right into the motor. Invisible. Nothing to move or set or measure. Just start your Gramofon, and it plays and stops itself.

Ask us to play these Columbia Records for you:

The Love Nest, from <i>How</i>	Frank Conroy	A-2973

Watch for Hoppers

(Lethbridge Herald)

Sections trouble can be looked for next spring from the grasshopper menace in some points in southern Alberta, according to Dominion Entomologist Strickland. Mr. Strickland has been keeping his eyes open and has seen indications that makes him believe hoppers will be very bad next year.

He received a report that hoppers were eating the fall wheat and rye and investigated one report from north of Lethbridge. He did not consider this matter as very serious and no active campaign is being carried out. Complaints received have not been general.

At Welling Mr. Strickland found two thousand grasshopper eggs in two square yards.

Rockyford Locals

Geo Kennedy is sporting a new Baby Grand Chevrolet car.

Mr. and Mrs. Kinnman have returned from a two weeks business trip in Southern Alberta.

Alva Ruppert spent several days this week on a purchasing trip at Calgary.

The Canadian Bank of Commerce is tick on its new fall colors. The new tint is said to make a wonderful improvement.

Mr. and Mrs. M. D. Pever of Calgary spent last Wednesday and Thursday in our town, the guest of Mr. and Mrs. McGuire.

The notices for the coming election on the Canada Temperance Act are out. The election will take place on October 25th at 4 o'clock of morning, in retaining office for this district. Mr. J. B. McGuire has been appointed Registrar for the district which comprises all of township 26-25 and the Northeast portion of 26-22.

Mr. and Mrs. S. L. Levitt spent a few days in Calgary attending the New Year festival.

The Rockyford Post room, recently closed by Mr. Johnson was sold during the last week to Hubert Brown of Calgary, who will personally come to Rockyford and manage the post office. The building, which has been at present undergoing several repairs and the inside is being furnished, and they plan to increase the equipment. Messrs. Bishop Bros. have had considerable experience in handling post rooms, at present being proprietors of the McLeod Black post room, situated on 5th Ave. Calgary. The Reporter wishes the new business men every success.

Mr. V. C. Chapman is at present having some repairs done to his well with Harry Graham in charge.

Mr. and Mrs. Sherman and Miss Leck, formerly of Rockyford and now of Innisfail, were visitors in Rockyford Sunday and Monday. During their stay here they were entertained by Mr. and Mrs. F. Gibson.

The dry weather is continuing and the snow is melting rapidly. Two more weeks should see all of the thawing done. Mr. Louis Lavigne, agent for the Twilford Grain Company is having a house erected on Railway Avenue. The basement is already completed and the building will be started immediately. Messrs. Swinson & Co. are the contractors.

Syd Duncay recently purchased a Kinsey thrasher and is now busy thrashing his large crop.

Mr. and Mrs. Laingstein of Manhattan, Kansas, spent the past week in Rockyford. Mr. Laingstein is Agent for the Twilford Grain Company and has been travelling over Southern Alberta for the past month in the interests of his company, spending the most of the time at Chatham, Rosedale and Rockyford. They are returning to their home in Manhattan in the course of a month or six weeks via Vancouver and Seattle. This is their first trip through Alberta and they are very pleased with the country.

Don't forget the concert and dances at the town hall on the 17th, by the Variety Quartet. NEW SEATS are being secured for the hall and every one will now be comfortable to enjoy the concert and other entertainments in comfort.

A magnificent ball to be held in the Hall on Friday, September 24th. An enjoyable time is assured and a large crowd will not be in attendance.

A chinaman by the name of Louis Lam, cook on Budd's ranch was one day last week treated by some of the other employees of the ranch to a tree ball, tree for the chinaman, but it terminated in the police court and the sport cost the ringleaders \$5.00. Two of them, John McKenzie and Fred Miller, being fined \$5.00 and costs and having to pay for the chinaman's watch, which was lost and also a pair of spectacles.

Prosecution was conducted by Mr. J. B. McGuire and the case was tried before Fred H. Hunter, our local Justice of the Peace.

Tax Sale List

Municipal District of Keoma, No. 249, Alberta

Date Of Sale, Wednesday, November 10th, 1920, at 2 p.m.

Place Of Sale, Municipal Office

Sec. 7, Tp. 26, Rge 26, W.4th

Western Canada Irrigation Association

The Fourteenth Annual Convention of the Western Canada Irrigation Association was held last month at Lethbridge, Alberta, and was a large and enthusiastic gathering.

New Farmers Organization
When the Association first began its work, its meetings and conventions were attended largely by technical and professional men, engineers, railroads and government officials, foresters, etc.; today it is not only attended by such men but by farmers as well, for the farmer has come to realize the benefits and advantages that membership in such an association brings with it. He is vitally interested in irrigation, interested in the point that he is now demanding from the government concerned, encouragement and help in irrigation extension; he wants the water on his own land for he wants the increased crop output that only irrigation can return him. And why should he? He would not be the aggressive farmer that Alberta farmers are if he didn't. He has always before him the figures of the locked increase due to irrigation, 77 per cent on wheat, 51 per cent on oats, 81 per cent on barley, 51 per cent on peas and 105 per cent on potatoes that the Government Experimental Farm at Lethbridge has demonstrated to him can be grown.

Irrigated Crops Bringing Great Returns.

He thinks of the production on the 52,220 acres of irrigated land in the Lethbridge district that placed the value of land in that section, last season, at \$57.17 per acre, and remembers that potatoes and garden crops averaged \$250 per acre, alfalfa \$125 and wheat \$100. He is informed that irrigated crops grown at Hoods in the C.P.R. irrigation block, east of Calgary, took many first prizes at the Pocatello (Idaho) Irrigated Products Exposition, and that one thirty-acre irrigated field of rice returned a lower \$150 per acre.

All these things and many others in favor of the irrigation farmer, and as a result the Medicine Hat district has a prospect to spend the water over 15,000 acres; the Macleod district, three percent of time, 10,000 and 20,000 acres; while southwestern Saskatchewan and British Columbia have like prospects on a smaller scale. It is not question now with these men as to whether irrigation is desirable or not but rather just how long profitable crops can be grown without it.

Argument in Favor of Irrigation
Many arguments can be advanced in favor of irrigation being in all ways superior to dry farming because it is the only system that permits of the most intelligent treatment of every

individual crop to suit its requirements. It eliminates the necessity of summer fallow and elaborate treatment of the soil in order to conserve moisture. The basis of all true agricultural prosperity is mixed farming, and irrigation is especially adapted to it. By its means special fodder crops, such as alfalfa, clover, vetch, etc., the success of which without water is problematical, can be raised in every case where it has been put to the test in competition with ordinary farm methods. It has been proved to increase production from 25 per cent to 100 per cent. From the point of view of the community which depends upon the agricultural class for its own sustenance, it has proved highly desirable because it means smaller farm units, closer settlement, intensive farming, increased trade, and a larger spending capacity per head of the tributary population. Admitting the truth of the foregoing it is clear that the primary reason for irrigation is crop insurance.

For all these reasons, the Fourteenth Annual Convention at Lethbridge was largely attended, and many important resolutions affecting the welfare and future of irrigation farmers were drawn up and forwarded to the various Provincial and Dominion Governments.

Rexall Pigeon Race

One of the most spectacular sporting events ever arranged in this city will be conducted on September 17, when thousands of Rexall Homing Pigeons, racing in pairs, will fly from points within a radius of 5000 miles of St. Louis back to the home loft in that city.

Scores of married men who have won the great pigeon loft in St. Louis, where more than 5,000 birds are in training for the big Rexall Derby, have had revealed to them by this feathered clan some beautiful examples of domesticity.

The most prominent trait in the character of the homing pigeon, of course, is his love of home. His birthplace, the loft in which he is bred, reared and trained, is home and no other spot on earth, no matter how alluring, has any interest for him.

The care and training of these pigeons has been under the direction of someone who understands the direction of the American battalions during the world war. Many of these war pigeons were distinguished and were hailed as heroes because of their intrepid and soaring flights through rain of bullets and sharp-shooting long back to headquarters messages from observers at the front that resulted in saving the lives of hundreds of American boys in the battle line.

Pigeons are going to be sent to Rex all druggists within five hundred miles of St. Louis. At a specified hour a pair of these birds will be released by the Mayor, some other high official, or a girl delegate by the mayor, and sent on its way to the St. Louis loft. Each bird will carry a bird message beneath its wing addressed to the Governor of Missouri, who personally will be at the Rexall loft to receive it. Handcuffs as to time and distance have been worked out, and the first bird trapping in at the Rexall loft will win the golden prize.

The race is to be the crowning feature of the annual convention of the United Drug Company, at which upwards of 5,000 Rexall druggists from all parts of the country will meet. At the same time the new \$4,000,000 factory erected by the United Drug Company for the manufacture of all local products for the Western States will be inspected for the first time by the Rexall delegates, all of whom are stockholders in the United Drug Company.

Top Heavy with Industry

"It is by a lower tariff that the position and politically can be strengthened and politically, can be strengthened. The rural communities are today the most important elements in Canada. The farmer has for forty years been handicapped by the tariff, while both manufacturer and employee in the cities have taken advantage of the position to bring about such favorable living conditions as to produce a serious depopulation in the rural districts. Canada is top-heavy with industry, while the basis of the structure has been neglected. A very gradual reduction in import duties will remedy this unsatisfactory condition."—Monthly Times.

Miss Clara Baxter, of Independence, Iowa, has now taken up her duties as Postmistress in Rockford.

The Ideal Plant for Farm and Workshop

YOU want cheap power for light machinery, in farm buildings or workshop, and a minimum waste of power. The "F" Power and Light Plant delivers all of its 1 1/2 horse power direct to the machine you want to run. It saves "50% power loss" of driving machinery by electric motors, because it does the same amount of work, belted direct to the machinery, as a 3-horse-power engine generating current to drive the same machines by individual motors.

Utilizing the spare power of the "F" plant does not interfere with its efficiency as a lighting unit. Come in and see the "F" plant at work, or send a post card asking for catalogue which contains complete information.

A big time was held in Brooks last
Wednesday evening, according to the
Calgary Herald. The town was well
livened, and the fights were of common
occurrence. Half-drunken promoters
were interested in the local job.
Whisky is said to have been sold off
early, and gambling was engaged in by
red-light and patronized by crowds.
If the account is correct, Brooks would
be a fine place for a vacation, when
life becomes stale and uninteresting.

Mr. Ed. Schreyer's many friends will
be glad to hear that he is making a
good recovery after his serious accident
last week.

The demonstration farm have been
busy for the last week or two cutting
the 25-acre crop of sunflowers, with
a corn blinder, and filling it into silos
along with oats. The two larger silos
are now filled, and by the time the
two smaller ones are filled there will
be 1000 tons of feed in storage.

The Dept. of Education, having
reconsidered the papers of Arthur
Lambert and Hazel Sim, have passed
them into grade eleven.

Mr. and Mrs. Alex Beveridge and
family, Calgary, were visiting with
Mr. and Mrs. John Mackenzie last
week.

Great interest was taken locally in
the baseball series between Calgary
and Regina for the championship of
the Western Canada League, and
many of the local fans were up several
times during the course of the series.
On Saturday, the concluding game,
there was a very large representation
from Strathmore to the local spot,
when Calgary was on the down, and it
looked as if they had no chance at
all, put up \$10 to a Regina supporter's
bait that Calgary would win the series.
On Saturday night he had the
pleasure of collecting his money.

A freight engine shunting cars in
Strathmore yard on Monday lashed
into two caboose so hard that they
were both damaged, and had to be
left behind in the yard to await repair.

C.P.R. employees (in the railway de-
partment) have been granted a raise
in pay, consequent in the increase in
freight rates.

A grand opening dinner will be held
in the King Edward Hotel Hall on
Wednesday evening of next week.
Watson's soupless Calgary breadstuffs
has been engaged, and no expense is
being spared to assure a real good
time to all who attend. The prom-
oters are Messrs. Miller and Callaghan,
of the King Edward Hotel, and it is
their intention to continue these dinners
throughout the winter.

In expectation of a visit from Mr.
E. W. Healy, President of the C.P.R.,
the local department of the Company
have been busy getting everything into
first-class shape for inspection.
Rounds one of a general inspection
of the staff. If there were buttons to
polish the analogy would be complete.

Mr. W. C. Brown is offering some
bargains in second-hand cars and
trucks at present.

One of the most interesting law
cases around here during the week-
end, Mr. Samuel Hirtle's car was run
down by another car on Sunday on the
main road, and a lot going to the
land overgrown in the road south of
town on Saturday, nobody was injured
in either case.

The death took place on September
11, of Mr. S. L. Joshi, of Billingshale
Street, St. John's, who was a resident
locally, was interred with Mr. A. B.
Whitney in last close to Strathmore.
We understand he leaves his estate
to his nephew, Mr. George Joshi, of
Billingshale Street.

Now that fall is commencing, the
moving process will be opened much
earlier in Strathmore, we hear, and
will be held each Wednesday and
Saturday.

A big Masquerade Ball will be held
at Chamberlayne Memorial Hall on Fri-
day, September 20th.

Who Said It Was Cold?

Well it isn't. Not yet! But the fellow with a full
coat bin isn't worrying about the weather forecast.
Neither is the fellow who has his winter's supply of
warm clothing.
Our fall goods are coming in every day and we ask
your early inspection.

It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to act in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

BEECHAM'S PILLS

Worth a Guinea a box.
Sold everywhere in Canada. In boxes, 25c., 50c.

Passing Events

Second only to the perverted view held by a vast majority of people that the chief aim in life is the amassing of money and the enjoyment of those fleeting pleasure and luxuries which money can procure, is the gullibility of the public in matching at get-rich-quick schemes, which seduce the virtuous but clever promoters and swindlers dangle before the people. The idea that there is something fast and noble in work itself, in worthy ambition realized, in service well rendered, and that a monetary reward is not, and should not be, fast doing out, and a person's earnestness or failure in life has come to be measured by the standard of his success in amassing money. It is a false standard and an unsatisfactory one. The truly successful men and women are those who can point with conscious pride to some real achievement benefiting themselves and their fellow men.

The desire to get money not honestly earned—which can only be gained by one individual through the loss by some other individual—and to get it quickly and without effort, is the bait used on every trap set for the unwary, and for every one who does obtain wealth in this ill-gotten way there are hundreds of victims who lose.

The latest example is afforded by the operations of a man named Punt, at Boston, who promised to pay 50 percent profit in ninety days on money invested with him. Thousands of people entrusted him with their money to a total of many millions of dollars. Now he is bankrupt and in prison, while his victims are wiser. The only safe road to wealth is along the cultivation and practice of habits of industry, frugality, perseverance and care. And even this road may not lead to the desired haven. But if it does not, there need be no regrets for travelling along such a road a person will at least have the satisfaction of accomplishing something, and leaving the world better than he found it.

Indications as to the relative degree of activity prevailing in business circles in Eastern and Western Canada are shown by various statistical tables for the month of July last, and these reveal the fact that, while development in the East is only about holding its own with last year, in the West very marked strides forward are being made. Building permits issued in July in 26 Eastern cities totalled \$7,542,536, as compared with \$6,959,444 in July, 1919, an increase of only \$271,495, whereas in fourteen Western cities permits issued amounted to \$5,084,020 as compared with \$1,726,995 a year ago, or an increase of \$3,357,025.

Several large Eastern manufacturers concern have shut down portions of their plants temporarily, or have reduced their staffs, thus throwing a considerable number of men out of employment, one firm alone, which has run three shifts of workers for the past nine years, cutting the num-

ber to two and releasing 600 men from employment.

On the other hand, the annual influx of harvest hands into the West has brought thousands of young men here, and the banks are anticipating the need of generous assistance from the federal government in the task of financing the marketing and transportation of the 1920 grain crop which promises to be the best for some years past.

In this column some weeks ago the advice was tendered to all who could possibly do so to buy their winter's supply of coal and get it in storage during the summer months before the grain crop began pouring into the elevators for transportation to the lake ports. Those who followed this advice will unquestionably be glad of it, not only because they are assured of an adequate fuel supply in the face of a probable shortage, but because of the money they will have saved thereby as it now seems almost a certainty that there will be a decided increase in freight rates and a consequent substantial jump in the price of coal. In these modern and more commercial days the parable of the wise and foolish virgins still holds good. We call it "Preparedness" or taking time by the forelock, that is all.

Guiltily of Assassination

A man, razor in hand, was caught by his wife assassinating not an enemy, but a consultant he needed was Puntin's Corn Extractor, it's safe, painless and cures. Try "Puntin's" cures so fast, 25c. at all dealers.

A Shocking Tragedy

Three Hundred Patients on Hospital Ship are Drowned
Particulars have reached Stockholm of a terrible catastrophe which occurred on the Nova recently, when a hospital ship sunk with 1,200 spotted patients on board. It was an old German vessel. The patients were locked up in their cabins. Before the ship sank it was plundered by the Bolsheviks, who unconcernedly left the patients to their fate. About 200 are believed to have been drowned. Nothing is mentioned of the matter in the Bolshevik papers except that 200 of the crew perished.

Minard's Liniment for Danfurth.

New Canadian Warnings
Cable advice received at Ottawa by the Naval Department state that the cruiser Aurora, and the destroyer Patriot and Paragon, will be in commission October 1, and will in all probability proceed to Canada in the week following. These three vessels, together with two submarines now in Canadian waters, comprise Canada's new fleet.

Bulbasan, an Italian painter, drew caricatures in the fourteenth century, putting labels with sentences to the mouths of his figures.

There are 400,000 cafes in France—one for each eighty inhabitants.

Keep Thin in Middle Age

Courpulence May be Reduced by Abstaining from Fat Meats
Adding to the bulk of the body in middle age is risky. This does not mean that the diet should be Spartan. It must be simple and moderate. Tasty dishes tempt stout people to eat too freely. Courpulence may be reduced by abstaining from fat meats, sugar, soups and pastry. Bread and potatoes should be eaten rather sparingly. Fresh fruit and green vegetables may be taken in moderation. No sedentary middle-aged person can eat hearty meals habitually without impairing health and curtailing the span of years. The diet must be plain and digestible, and the quantity eaten limited strictly to the repair of tissue expended in work.

MOTHER!

"California Syrup of Figs"
Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, for the delicate child. It is the only one that is so easy to take. Give it without fear. You must say "California."

Belgians Are Doing Well

Every Inch of Soil is Cultivated and Crops are Bountiful

The British Mission at Spa were astounded at the smiling prosperity of Belgium. Every inch of soil is cultivated, and the crops are bountiful. Indeed, one might well learn a lesson from the Belgians in the use of the land. It may safely be said that in Belgium every single field is utilized to the fullest extent.

Building of all sorts are in splendid order. More coal is being produced than before the war; the goods are coming back; there is a great deal of enterprise, and generally speaking, Belgian industries are thriving in a remarkable way.

The Belgians are to receive eight percent of the war indemnity. If it is fixed at \$2,000,000,000, they may hope to receive \$400,000,000, in addition to which there are to have a first charge over the first hundred millions of their share.

In other words, every Belgian will get about \$60 per head war indemnity. Today the Belgians, in proportion to their numbers, are accounted the richest people in Europe.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional one of the Tablets prevents stomach and bowel troubles, or if the trouble comes and lasts it generally does the harm. It will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Vanderbilt Buys an Island

Cornelius Vanderbilt, Jr., states that he has purchased for his wife an island in Sprat Lake, near Albert, Vancouver Island. He intends to construct a hunting lodge at which he and his wife will spend vacations.

Saves Three Lives

George Bastien is to be recommended for the Humane society medal, for having saved the life of two dogs at Nohel, Ont. It is also stated he saved another life at Sault Ste. Marie some weeks ago.

When a woman can't get a servant to do her work there is no help for it.

Perfected Aeroplane To Explore Africa

Easily Attains Speed of A Hundred Miles an Hour

A new type of hydro-aeroplane, operated by three helices, has been completed and will be marketed soon by Jean Latham, son of Robert Latham, who two years before the war met his death while hunting in the Congo. Scientists here prophesy that Mr. Latham's invention will greatly facilitate exploration work in the interior of France's colonies, as it combines three great factors—speed, manoeuvring power and comparative lightness of equipment, and furthermore is able to use the smallest streams in case of accident.

The cabin contains room for four passengers, as well as compartments for reserve supplies of petrol, food, wireless apparatus and machine guns, all of which are in a birch bark canoe body. All the machinery for the operation of the craft is above the heads of the passengers.

In trial tests the hydroplane, carrying three tons mounted with a motor in four minutes, a mile in thirty-four minutes and three miles in eight-four minutes. The speed test showed a maximum of a hundred miles an hour, which was easily attained.

Movies of Hudson Bay Country

The great naval seaplane of the Canadian Aero Film Company has left on an 800 mile trip to Hudson Bay, where pictures will be taken for the provincial government and a survey made for the Dominion Lands Department. The plane is bound for Belcher Island on the west coast of Labrador in the Bay, and stops are being made at North Bay, Cochrane and Moose Factory.

Less Employment in East

Reports Indicate, However, That the Labor Market Firm on Prairies

Reports from over 5,000 employers to the Dominion headquarters of the Employment Service of Canada, department of Labor, indicates that, disregarding loss of time due to strikes, there was a decline in the volume of employment during the week ending July 5, as compared with similar reports covering the previous week. A decrease had been expected, but not on such a large scale. For the following week, however, the construction reports covering the previous week, anticipated making substantial additions to their payrolls. In comparison with their returns they reported that they had not changed their staffs very considerably.

The three Prairie provinces were the only ones to record an increase, while among the decline Ontario had the biggest. The best increases were in railway construction work, edible and non-edible products, and building. Further increases were expected. Large reductions were among the firms manufacturing rubber goods and iron, steel and timber products.

A slight decrease in payments by the employment service is recorded by the department for the week ending July 5, as compared with the previous week.

High Prices at Cattle Fair

The Brandon Cattle Fair had its usual success and bidding was keen and prices high. The highest price, Aberdeen Angus, "Blackbird of Glen-carraig," brought \$3,000, and won the Female Grand Championship. The animal was retained in Canada by a Bowden, Alta. ranger. In all 63 Aberdeen Angus and 83 Shorthorns were sold.

No surgical operation is necessary in removing corns if Holloway's Corn Cure is used.

Externally or Internally, it is Good—When applied externally by back rubbing, Dr. Thomas' Electric Oil opens the pores and breaks down the tissues as few liniments do, touching the seat of the trouble, it penetrates deeply, soothing relief. Administered internally, it will still the irritation in the throat which induces coughing, and will cure affections of the bronchial tubes and respiratory organs. Try it and be convinced.

The Imperial canal of China has a length of more than 1,000 miles.

Used for 70 Years

The use of Goodenough's Oriental Cream for 70 years has proved its value as a youthful appearance has remained undiminished by time and age. It is a beauty, a home, a memory, a pleasure, a necessity, a while appearance it renders lovely the joy of beauty with you for many years.

eaten with roast beef and other meats, fish, game, poultry, cheese, etc., causes better digestion, and assures full nutrition.

There are many brands of tea and coffee—you take your chances on quality—and you pay the price.

But there is only one brand of

INSTANT POSTUM

—invariably high in quality and invariably moderate in price. A Fair Trial Tells.

Canadian Postum Cereal Co., Ltd., Windsor, Ont.

The Noble Foundation Said to be the Largest Grain Farm in the World

To stand in the midst of a single field of wheat and see nothing but wheat as far as the eye can see, to see dozens of binders tearing through the greatest single stand of grain ever seen in the west, is the experience of anyone who visits the Cameron ranch of the Noble Foundation, 20 miles northwest of Lethbridge, Alberta, while cutting is in progress on the 9,000 acre wheat field.

Three years ago this immense field of grain was laid virgin, now it is yielding up its first big harvest of wheat at an average of between 25 and 30 bushels to the acre over the whole area. C. S. Noble, who owns and is known as the largest grain farming company in the world, started years ago with half a section of land—320 acres. Today his holdings total 33,000 acres on all his farms, and he has a clear title to every acre of this. Of this area he has 28,600 acres cultivated, 112 are in orchards and 3,600 are used for grazing purposes. This year he has 14,280 acres in crop in all grains. Of this there is 12,410 wheat, 2,290 in oats, 3,517 in rye and 70 in flax. He has shown his faith in winter grain as a means of combating soil deficiencies and obtaining great deal of it. He has on one farm 100 acres of volunteer rye which yields eight bushels, another field of 1,000 acres of volunteer rye which might yield more, 70 acres of rye that will yield 21 bushels, and 80

acres that will yield 25 bushels. He also has 20 acres of Kossen rye that will yield 30 bushels.

The majority of the crops this year are wheat, as is known to everyone on ranch, where there are 9,000 acres in wheat, 2,300 acres of rye, 1,500 acres of oats and 70 acres of flax. It is expected that the total acreage will yield 307,350 bushels of wheat, 137,400 bushels of oats, and 70,340 bushels of rye, worth roughly about one million dollars. To harvest this immense crop 60 binders are at work, using 240 horses in addition to the enormous number of helpers required to carry on the necessary work.

To save a fifteen mile haul from ranch to railway, Mr. Noble has established a unique system conveying his wheat over the railway to the Little Bow River, two miles away, by aerial tramway to the south side of the river, and thence by rail to the grain into the elevator he has purchased.

A huge granary on the slope of the country, and it into a huge elevator built with a capacity of 90,000 bushels. As the grain goes into this it comes out at the foot in a chute which carries it into a hopper and then over the river. This carrier has a capacity of one ton. The grain goes into a hopper on the other side from which chutes lead into wagons, the whole operation being done by gravity.

Experiments in Swine Feeding

Self-Feeder Proves More Economical Than Trough Method

Experimental work with swine has been underway on the Scott Section for three years. The list of experiments includes a comparison of methods of housing, comparison of feeds and methods of feeding and determining the value of pasture. One of the first points noted in examining the data collected is that swine raising and feeding has proven profitable during this period, notwithstanding the high cost of feed and labor. Out of all the experiments tried out only one has shown a direct loss and this was due to poor ventilation in the building in which the hogs were housed and consequent illness.

The information secured indicates that profitable gains can be secured by use of the self-feeder. In most of the experiments the self-feeder has resulted in more economical feeding than the trough method. The conclusion reached is that where the cost of an experiment in hog raising can be secured equal gains to the self-feeder method, but where the feeder is not well versed in the art of feeding then the self-feeder method puts the hogs to use sufficient quantity of feed to permit vigorous growth.

The matter of pasture for swine is a debatable one. It is possible that very young pigs will make more use of a green feed than older pigs, but that they have the run of a large pasture. On the other hand, the cost of maintaining hogs on pasture can be substantially decreased by the use of pasture.

A comparison of wintering swine in large central buildings with that of having the swine in small pigsties has shown the small pigsties to be the most profitable since it is an exception to have a sick or rheumatic pig in the small cabin while in a large central piggery this frequently occurs. Brood sows that have wintered in small pigsties some distance from the feeding trough have always produced good results for feeding. This is important that most people realize. That the feed plays an important part was shown by the experiment conducted last winter when barley and oats were fed in direct comparison with standard screenings and oats. The results showed that feeding value of the first material was considerably superior to either of the other two. While the shorts and oats produced the least economical gain.

Due to the high prices lately prevailing in Alberta, the cost of fall hogs early fall prices. When straw sheds or in portable cabins have been tested out in winter months. These pigs were raised under conditions similar to those existing on the average farm, which is no milk was available and the water was of water and grain, with no shelter for roughage, and when available was of the poorest quality. The pigs usually did not make very rapid gains during the extremely cold weather, but they killed out rapidly more the warm spring weather set in, and a couple of weeks of the self-feeder resulted in wonderfully rapid gains.

In conclusion it might be pointed out that swine raising, like all other lines of business, must be consistently and carefully conducted. Much of the loss from Lesser Slave Lake in the past has been due to farmers and others going into the business for a comparatively short time and at the first step of the business. The market dropping of their entire stock.

Beaver Ranching In Canada

High Prices of Furs Results in the Domestication of the Beaver

The conservation of wild life on the continent and the domestication of wild animals for their fur has of late been receiving widespread attention and encouragement both on the part of the government and the people, and because it tends to offset the natural depletion by trap, gun and slaughter. The ceding of a thirty-year grazing lease to Viljundur Stefansson on the southern portion of Balgonie, to raise reindeer and caribou, is an indication of this, while the formation of muskrat farms has been much advocated on account of the profitable nature of the industry, a profitable factor of which is the permanent maintenance of such an industry.

The rapid decline of the beaver throughout the continent and consequent high prices for the furs of these animals have drawn attention to their conservation, the feeling of domesticating the beaver, or rather cultivating the animal in its native state under domestic restraint, is receiving much consideration. A beaver ranch was established last fall on the ranch of H. C. Hales, a farmer of Milton, Prince Edward Island, his first pigs selling for over \$40 to \$50 apiece.

The location for the ranch was as desirable one—the animals' natural instincts were being fostered, and an ample provision of natural sustenance. The lush little island, some right about with their dam, would supply the beaver with food, close them and prevent possible migration did not apparently answer to any extent, and they continued to propagate and follow out their regular routine as if unimpaired by the schemes of man.

The beaver, which was early recognized as typically Canadian, found a permanent memorial on the western side of the continent, and on the fact to be found in every part of the Dominion. It usually disappears with settlement, however, and statistics go to show that the supply of beaver in the wilds is rapidly diminishing, and that in a matter of twenty years will be reduced to a few stragglers. The beaver, however, the establishment of farms, have followed the beaver in practical oblivion and extinction.

Beaver ranching is an industry which would receive every encouragement. The trapping of beaver has always been a profitable pursuit while the high price of the fur, which would be held, is sufficient encouragement. Given a careful choice of location, a ranch is economic of operation, a ranch can be probably run on a line of little expense, after the initial outlay.

Japs Carving World's Largest Statue

Will be Reclining, Figure 240 Feet Long

On the Isle of Cowa's Head, in that beautiful island sea, which has been available since the second world war, a large of rock overflows the sea, and here a small army of Japanese workmen are busy at the first cuttings that will eventually carve out the largest statue in the world.

The Colossus of Rhodes, at one time one of the seven wonders of the world, is said to have been 120 feet high—a small thing compared with the figure of Liberty that stands 151 feet high as revealed in New York. The Japanese statue will be even greater magnitude. Following the line of the original rock, the statue will be 240 feet long, and will therefore that much more impressive than the Buddha at Pegu, Burma, which from head to foot measures 182 feet. The Isle of Cowa's head, the private property, and this Breeding-station monument is a work of private enterprise. The carving, however, will be that of St. Nicholas, who founded the order of Buddhism that bears his name. In the wooden model, the statue is a reclining figure, and even sees him, his head pillowed on a block, and his left arm extending along his side; a somewhat arabesque figure, yet with considerable realism. For the enormous statue that is to be cut out of the solid rock from the steep cliff being carved out, the statue of Cowa's head will provide an excellent setting.

Polled

"Oh, Charlie, I'm so worried! You know you told me to put that piece of land in the hands of the bank, and I'd read of me future husband!" "Yes, dear; didn't I?" "That's what worries me, I dreamed of the Seventy-third regiment."

Norwegian and Danish languages are almost similar save in pronunciation.

Heavy Decline in Wheat Growing Shown Since Pre-War Years

The average world's yield of wheat in the war years 1914 to 1918 is ascertained to be 38.3 million metric tons, a quantity slightly below that of the average five years when the average crop was 10.6 metric million tons, says a recent communication from the International Institute of Agriculture, Rome. It might appear from the respective aggregate that the war had not seriously affected wheat production, but the reality picture is quite otherwise. The official data published by the Institute record the profound influence of war with regard to cultivation alone in Europe and other continents. Such attempts as were made by European governments, to insure adequate crops proved unsuccessful. In spite of all inducements offered to farmers, and of the many obligations imposed upon them, with the view of keeping up wheat area, there was a decrease from 120,000,000 acres in 1913 to 112,000,000 in 1918, and from an average of 130,000,000 acres from 1902 to 1914, to 114,000,000 acres in 1918. In other words, a decline of about 10 percent. The data of yields indicate a decrease even more serious than the decline in area. While the aggregate yield in 1913 was 37.8 million metric tons, the figure for the war years, to 41.3 million tons in 1918, while the average of 52,000,000 tonnes during the five pre-war years decreases to 41.6 million.

My summary by reminding that the decrease in average European yields during the war period is about 10 percent, it is almost balanced by an average increase of 8,000,000 tons in other countries, and that the net annual deficiency was therefore no more than 2,000,000 tons, a quantity which is in practice insignificant—Toronto Globe.

My summary by reminding that the decrease in average European yields during the war period is about 10 percent, it is almost balanced by an average increase of 8,000,000 tons in other countries, and that the net annual deficiency was therefore no more than 2,000,000 tons, a quantity which is in practice insignificant—Toronto Globe.

tion for the five seasons of conflict, or more than 10,000,000 (20 percent) below the previous crop. The gravity of this situation as regards Europe was fully appreciated overseas, and with one accord every region over the world-wide co-operation in order to save from longer hundreds of millions of war-worn people, doing its utmost to furnish Europe with its indispensable requirements. Thus we may observe that North America increased its wheat area in one pre-war average of 55,000,000 acres to about 70,000,000. Asia advanced from 45,000,000 to 53,000,000, and Australia from 7,000,000 to 10,000,000, with a corresponding increase in the average yields. Those of North America surpassed the pre-war figure by 5,000,000 metric tons; in South America over

It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to work in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

BEECHAM'S PILLS

Worth a Guinea a box.
Sold everywhere in Canada. In boxes, 25c., 50c.

Passing Events

Second only to the perceived view held by a vast majority of people that the chief aim in life is the amassing of money and the enjoyment of those fleeting pleasure and luxuries which money can procure, is the gullibility of the public in matching at get-rich-quick schemes which necessitate but clever promoters and swindlers dangle before the people. The idea that there is something new and noble in work itself, in worthy ambitions realized, in service well rendered, and that a monetary reward is not the best and end-all of existence appears to be fast dying out, and a person's success or failure in life has come to be measured by the standard of his success in amassing money. It is in this false standard and an unsatisfactory one. The truly successful men and women are those who can point with conscious pride to some real achievement, to some service rendered, to some benefit bestowed upon their fellow men.

The desire to get money not honestly earned—which can only be gained by one individual through the loss by some other individual—and to get it quickly and without effort is the bait used on every trap set for the unwary, and for every one who does obtain wealth in this ill-gotten way there are hundreds of victims who lose. The latest example is afforded by the operations of a man named Powell, at Boston, who promised to pay 50 percent profit in ninety days on monies invested with him. Thousands of people entrusted him with their money to a total of many millions of dollars. Now he is bankrupt and in prison, while his victims are still, but it is doubtful if they are wiser. The only safe road to wealth is along the cultivation and practice of habits of industry, frugality, perseverance and care. And even this road may not lead to the desired haven. But if it does not, there need be no regrets for travelling along and a road a person will at least have the satisfaction of accomplishing something, and leaving the world better than he found it.

Indications as to the relative degree of activity prevailing in business circles in Eastern and Western Canada are shown by various statistical tables for the month of July last, and these reveal the fact that, while development in the East is only about halting its own with last year, in the West very marked strides forward are being made. Building permits issued in July, in Eastern Canada, totalled \$7,242,536 as compared with \$6,019,444 in July, 1919, an increase of only \$271,498, whereas in Western Canada permits issued amounted to \$5,098,030 as compared with \$1,726,090 a year ago, an increase of \$3,371,940.

Several large Eastern manufacturing concerns have shut down portions of their plants, temporarily, or have reduced their staffs, thus throwing a considerable number of men out of employment, one firm alone, which has run three shifts, has been closed for the past nine years, cutting the num-

Keep Thin in Middle Age

Corpulence May be Reduced by Abstaining from Fat Meats
Adding to the bulk of the body in middle age is risky. This does not mean that the diet should be Spartan. It must be simple and moderate. Tasty dishes tempt stout people to eat too freely. Corpulence may be reduced by abstaining from fat meats, sugar, eggs and pastry. Bread and potatoes should be eaten rather sparingly. Fresh fruit and green vegetables may be taken in moderation. No sedentary middle-aged person can eat hearty meals habitually without impairing health and curtailing the span of years. The diet must be plain and digestible, and the quantity eaten limited strictly to the repair of tissue expended in work.

MOTHER!

"California Syrup of Figs"
Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most beneficial laxative or physic for the little stomach. Livers are clogged. Children love its delicious fruit taste. Laxative effect is gentle and sure on each bottle. Give it without fear. You must say "California."

Belgians Are Doing Well

Every Inch of Soil is Cultivated and Crops are Bountiful

The British Mission at Spa were astonished at the smiling prosperity of Belgium. Every inch of soil is cultivated, and the crops are bountiful. Indeed, one might well learn a lesson from the Belgians in the use of the land. It may safely be said that in Belgium every single field is utilized to the fullest extent.

Buildings of all sorts are in splendid order. More coal is being produced than before the war, the people are working hard; there is a great deal of enterprise, and, generally speaking, Belgian industries are thriving in a remarkable way.

The Belgians are to receive eight percent of the war indemnity. If it is fixed at \$4,000,000,000, they may hope to receive \$400,000,000, in addition to which they are to have first charge over the first hundred millions of the share.

In other words, every Belgian will get about \$40 per head war indemnity. Today the Belgians, in proportion to their numbers, are accounted the richest people in Europe.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a parent's life is lost after only a few hours illness. The mother who keeps baby's own tablets in the house truly saves. The occasional use of the tablets prevents stomach and bowel troubles, or if the trouble comes through, only a generally dosed "Baby's Own Tablets" will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Vanderbilt Buys an Island
Cornelius Vanderbilt, Jr., states that he has purchased for his wife an island in Spring Lake, near Alton, Vancouver Island. He intends to construct a hunting lodge at which his and his wife will spend vacations.

Saves Three Lives
George Bostwick is being recommended for the humane society medal, for having saved the life of two bathers at Niles, Ont. It is also stated he saved another life at Sand Sea, Marie some weeks ago.

When a woman can't get a servant to do her work there is no help for it.

Pericles Aeroplane To Explore Africa

Really Attains Speed of A Hundred Miles an Hour

A new type of hydro-aeroplane, operated by three helices, has been completed and will be marketed soon by Jean Lachlan, son of Herbert Lachlan, who two years before the war met his death while hunting in the Congo.

Scientists here prophesy that Mr. Lachlan's invention will greatly facilitate exploration work in the interior of France's colonies, as it combines great speed, great range, great fuel power and comparative lightness of equipment, and furthermore is able to use the smallest streams in case of accident.

The cabin contains room for four passengers, as well as compartments for reserve supplies of petrol, food, wireless apparatus and machine gun, all of which are in a birch bark canoe body. All the machinery for the operation of the craft is above the heads of the passengers.

In trial tests the hydroplane, carrying three tons, mounted half a mile in four minutes, a mile in eight minutes and three miles in thirty-four minutes. The speed test showed a maximum of a hundred and one hour, which was easily attained.

Movies of Hudson Bay Country

The great naval seaplane of the Canadian Aero Film Company has left on an 800 mile trip to Hudson Bay, where pictures will be taken for the provincial government and a survey team for the Dominion Government. The plane is based out of Belcher Island on the west coast of Labrador in the Bay, and ships are being made at North Bay, Cochrane and Moose Factory.

Less Employment in East

Reports Indicate, However, That the Labor Market Firm

Prayers

Reports from over 5,000 employers to the Dominion headquarters of the Employment Service of Canada, department of Labor, indicates that regarding loss of time due to strikes, there was a decline in the volume of employment during the week ending July 26 as compared with similar reports covering the previous week. A decrease had been expected, but not on such a large scale. For the following week, however, these firms anticipated making substantial additions to their payrolls. In comparison with their returns for similar periods they had enlarged their staffs very considerably.

The three Prairie provinces were the only ones to record an increase, while among the declines Ontario had the biggest. The best increases were in meat construction, saw edible plant products, and building construction. Further increases were expected. Largest reductions were among the dress manufacturing, rubber goods and iron, steel and lumber products.

A slight decrease in plants by the automobile service is recorded by the department for the week ending July 31, as compared with the previous week.

High Prices at Cattle Fair

The Brandon Cattle Fair had its usual success and bidding was keen and prices high. The highest price, Aberdeen Angus, "Blackbird of Glenbrook," brought \$2,000, and won the Female Grand Championship. The animal was retained to Canada by a Brandon, Alta., ranger. In all 60 Aberdeen Angus and 81 Shorthorns were sold.

No surgical operation is necessary in removing corns if Holloway's Corn Cure is used.

Externally or Internally, it is Good.
When applied externally by brush rubbing, Holloway's Kidney Cure opens the pores and penetrates the blood as few remedies do, reaching the seat of the trouble and immediately discharging it. Administered internally, it will still the irritation in the throat which induces coughing, will cure any affection of the bronchial tubes and respiratory organs. Try it and be convinced.

The Imperial canal of China has a length of more than 1,000 miles.

Used For 70 Years

This is the Grandmother's remedy, approved by the Government. It remained until youth has become a memory. The soft, refined, purely vegetable preparation gently soothes and restores the joy of living. For many years its service is recorded by the most eminent medical authorities and respiratory organs. Try it and be convinced.

Oriental Cream

For the face and body. It is the most perfect skin preparation.

AVOID ALUM IN FOOD

Baking Powder is one of the most important food ingredients. Alum or other injurious acids are frequently used by some concerns to lower the cost of production.

MAGIC BAKING POWDER

Contains No Alum

It is a pure phosphate baking powder and is guaranteed to be the best, purest and most healthful baking powder possible to produce.

W. Matthew Williams, in "Chemistry of Cooking," says: "Phosphates are the bone-making material of food and have something to do with building up of brain and nervous matter."

Heavy Decline in Wheat Growing Shown Since Pre-War Days

tion for the five season of conflict, or more than 10,000,000 (20 percent) below the previous crops. The gravity of this situation as regards Europe was fully appreciated overseas, and with one accord every region entered the world-wide co-operation in order to save from hunger hundreds of millions of war-worn people, doing its utmost to furnish Europe with its indispensable requirements. Thus

we may observe that North America increased its wheat area from the pre-war average of 35,000,000 acres to 70,000,000 acres, and the average yield advanced from 15,000,000 to 53,000,000 bushels, or from 7,000,000 to 10,000,000, with the corresponding increase in the average yields. Those of North America surpass the pre-war figures by 3,000,000 bushels, and in South America, the increase was 500,000 tons, in Asia 2,000,000, in Australia 500,000 tons. Natural causes, such as climate and surroundings, combined to prevent Africa from doing as well. In Europe, the pre-war yields in that continent remained at pre-war level.

We may summarize by remarking that the decrease in average European yields during the war period is about 100,000 bushels, which is more than balanced by an average increase of 8,000,000 bushels in other countries, and that the net annual deficiencies were therefore no more than 2,000,000 bushels, a figure which is financially insignificant. T. J. G. L.

Experiments With An

Eighty-Day Wheat

Other Varieties Have Not
Been Successful

A new pearl white wheat called "Quality" which would ripen in 80 days from planting is being grown by Douglas, Manitoba by W. J. Whitley who is very enthusiastic over its possibilities, and in this new wheat believes that he has wheat that will not need a new variety of fertilizer. The grains, in any event it appears to be very well suited to certain districts where other varieties have not been successful. The wheat is very adaptable to any climate it is raised in and can be successfully grown in a light dry soil. It most resembles the hard Northern wheat, "Price Marquis," but is not so hard. It has a different appearance and quality. The heads are of medium size, tapering to a point, beardless, and on ordinary stems three and a half feet in height.

Mr. Whitley has also been experimenting with a new kind of barley which threshes out exactly like

A Suburban Millionaire

**Says Idle Rich are a Curse to Society
And Humanity Alike**

In a small villa at Forest Hill, near London, lives a millionaire without servants or assistants, his wife doing all the housework. He is Mr. G. J.

recently offered £150,000 for a Victory Park. He is determined to die

poor. Wealth has left him quite unchanged. He still gets up at three o'clock every morning, works in the city all day, and goes to bed at seven-thirty. "Rich people who live a pampered life are a curse to humanity and society alike," is the view he holds.

The Farm Family

The farm family, because of its comparative remoteness from the turmoil and distractions of the city, has

wonderful opportunities to make a real home. Among these opportuni-

tics is that of beautifying the farmstead so that it may be more attractive to the occupants. This will tend to make both young and old more contented, will add materially to the enjoyment of those who pass by, and

incidentally to the selling value of the farm.⁴⁰

Rockyford on the Toot

The Rockyford Concert Band held its first practice meeting last Sunday evening with Mr. W. A. Longest of the Grand Theatre, Calgary, as instructor. The melodies that resulted by various people were not of a kind that would attract crowds, as certainly the neighbors close to the hall will testify. Nevertheless every Jack and John in town came in and tried one of the instruments from the concert and orchestra to the big bass. Many found out that what was not all that was needed to play several instruments and it will take several weeks and possibly several months before the band is able to give its first real concert, although bandmaster, Joe Hendricks, expects to be able to lead for the first concert before next spring.

The boys have gone to considerable expense to purchase the instruments as musical instruments at present are high in price and the price of insurance will run very high. It will be an effort for all the boys to spend much time every week for practice, entailing considerable loss of time, as also a deal of practice will be necessary for the band to become efficient in as short a time as possible. The band later on will require some financial assistance and we hope that the citizens of the district will come forward with generous donations in order to keep the band going and also to provide some amusement for next spring and summer. A band is a credit to a town and also a very good advertisement.

Standard News

Several threshing machines have started in the district.

Mr. Julian had the misfortune of having several tons of hay burn and the north side of his barn damaged.

From a good authority we have it that the crops in this district are the best to be seen for many miles around.

Miss Margaret Gregory and Miss Rosella Drydale left last week for Julian, Mich. to attend school at St. Joseph's Academy. They were accompanied by Mr. and Mrs. Adeline and son, who have been visiting here for the previous two weeks.

Mr. Albert Nougat received serious injuries to the head as a result of a kick from a horse. For some hours he lay unconscious at Mr. Joe Conley's, but we are pleased to say he is now making rapid recovery.

Mr. Davis has broken an arm as a result of an accident while thrashing at Joe Peterson's.

There was quite a large gathering of the Ladies Aid at Mrs. S. Hansen's last week. When Mrs. Hansen leaves for California in November, the aid will lose one of its most popular and regular members.

We would like to meet the man found here who has not more work than he can handle to handle as he would like to.

The shortage of absolutely necessary farm implements and repairs continues to be very acute. Several round here have made trips to Calgary without any results.

Centring your hands before they are thrashed to life coming your children before they are hatched. For some crops have only thrashed on 50 per cent of expectations while others are right up to the scratch.

The other evening, while we were at a visit to Rockyford a C.N.R. train arrived on time. So far local residents have been unable to see any explanation of this extraordinary phenomenon.

The building of the new Alberta Pacific Elevator is going on apace all the same it is rather late in the season and many farmers have already headed in many loads of wheat.

Mr. Thorvald Rasmussen has taken over the Dodge car agency.

Re-Union of Christian Churches

only say that we offer it in all sincerity as a token of our longing that all shall be available for the service of our Lord in a united Church.

IX. The spiritual leadership of the Christian Church in days to come, in which the world is manifestly waiting, depends upon the readiness with which each group is prepared to make sacrifices for the sake of a common fellowship, a common ministry, and a common service to the world.

BUY AN IRRIGATED FARM FROM

THE CANADIAN PACIFIC RAILWAY

BECAUSE—
Irrigation makes the farmer independent of rainfall and insures good crops, not occasionally, but every year.
Irrigation makes possible the successful culture of alfalfa, the king of fodders, whose horses give good returns in dairying and mixed farming.
Irrigation means intensive farming and close settlement with all the advantages of a densely populated agricultural community.
Irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the years that it has been tried having abundantly demonstrated its success wherever intelligently applied.
You can buy irrigated land from the Canadian Pacific Railway at prices averaging \$10 per acre, with twenty years to pay and the privilege of a loan of \$2,000 for improvements (4% interest) on principal after first payment until end of fourth year, reduced interest if settlement conditions are complied with and to water rental for first year. Contract can be paid in instalments if desired.

This is the most liberal offer of irrigated farm land on record. For full particulars, apply to

Why Not a Printed Letterhead

With the name of your business or farm on it.

"Scraps of paper," have contributed to the ruin of many a business. The German Empire is the biggest example of recent years. Do not write your correspondence on scraps of paper. Order a supply of good paper with your name and address printed neatly on it.

It will not cost you much more to buy some real bond paper with your name and address printed neatly on it than to buy writing tablets of doubtful quality from time to time.

Call and see samples and get prices.

EVERY kind of JOB PRINTING Executed with Promptness and good work guaranteed.
